

Nine different types of clickers are Compatible with *A+ Classroom Student Response Software*

Promethean®

Activote™

When you have the ability to use a variety of student devices combined with The American Education Corporation's *A+ Classroom Student Response Software™* (*A+ Classroom SRS™*), you create an ideal platform for creating truly interactive, whole-class, inclusive, and formative instruction.

TurningPoint®

ResponseCard RF

ResponseCard XR

With *A+ Classroom SRS* and one of these clicker devices, short-cycle assessments are not only a snap, but exciting for the whole class. Students join their assigned remote device to the teacher-selected activity then the fun and learning begins!

H-ITT

TX3100

TX3200

With *A+ Classroom SRS's* rich content library and varying teacher-defined complexity levels, students are engaged and teachers are in control. Choose a math competition for fun and effective formative instruction or a traditional, self-paced science quiz for student evaluation. *A+ Classroom SRS* makes learning so fun that students will be begging for more!

Renaissance Learning™

Responder

Neo2

eInstruction®

CPS

CPS Pulse

LearnStar®

StarPad® 2.4

StarLite®

Clickers used with *A+ Classroom SRS*

Designed for simple integration and deployment, *A+ Classroom SRS* can be installed across a LAN from a central server, allowing teachers to share content and data. Teacher workstations access program files and data from a local file server while students connect directly to

teacher workstations using their clicker device. The *A+ Classroom* Directory Service, running on a Windows or Mac server or workstation, manages teacher and student communication, allowing only designated students to join teacher activities.
